This course specification provides a summary of the main features of the course, identifies the aims and learning outcomes of the course, the teaching, learning and assessment methods used by teaching staff, and the reference points used to inform the curriculum.

This information is therefore useful to potential students to help them choose the right course of study, to current students on the course and to staff teaching and administering the course.

Further detailed information on the individual modules within the course may be found in the relevant module descriptors and the Course Handbook provided to students on enrolment.

Please refer to the [Course and Module Catalogue](#) for further information on the course structure and modules.

Educational aims of the course

This programme is designed to provide trainee teachers with the opportunity to study the theory and practice of education from the perspective of learners, teachers, administrators, policymakers and other key stakeholders in the system of formal education. It combines work based at the University with school experience in order to equip trainee teachers with the knowledge, understanding and skills that they need to begin to develop as a professional educator. It also provides them with the skills to make effective use of theoretical and research-based evidence to extend their knowledge and understanding and to allow them to reflect critically upon their own personal and professional values.

Achievement of the Teachers' Standards 2012 (DfE) are an essential part of the practical experience in school and the programme as a whole.

The aims of the programme are:

- To equip trainee teachers with a rigorous knowledge and understanding of the core areas of education – professional values and practice, knowledge and understanding and teaching (including planning, expectations and target setting, monitoring and assessment, teaching and class management).
- To enable trainee teachers to recognise the complex interrelationship between educational theory, policy and practice
- To enable trainee teachers to apply educational and research-based analysis to issues of their personal practice
- To introduce trainee teachers to conceptual and analytic methods used in educational research and to provide opportunities for the development and application of these tools
- To enable trainee teachers to develop critical, evaluative and reflective thinking in the context of their personal practice
- To enable trainee teachers to develop a range of skills and abilities that will contribute to their effectiveness as a professional educator
- To support trainee teachers in becoming independent learners in their subsequent career development.
- To encourage trainees to progress to completion of a full masters level qualification and make a substantial contribution to the development of their subject pedagogy during the early years of their career in teaching.

Changes to your course/modules

The University of Portsmouth has checked the information provided in this Course Specification and will endeavour to deliver this course in keeping with this Course Specification. However, changes to the course may sometimes be required arising from annual monitoring, student feedback, and the review and update of modules and courses.

Where this activity leads to significant changes to modules and courses there will be prior consultation with students and others, wherever possible, and the University of Portsmouth will take all reasonable steps to minimise disruption to students.

It is also possible that the University of Portsmouth may not be able to offer a module or course for reasons outside of its control, for example, due to the absence of a member of staff or low student registration numbers. Where this is the case, the University of Portsmouth will endeavour to inform applicants and students as soon as possible, and where appropriate, will facilitate the transfer of affected students to another suitable course.
